Jane Henney, M.D., Commissioner  
Food and Drug Administration  
Docket # 00P-1211/CPI  
5630 Fishers Lane Room 1061 (HFA-305)  
Rockville, MD 20852

Dear Dr. Henney,

I am deeply concerned regarding the threat that genetically engineered (GE) foods pose to the health of the American people and to the health of our environment. It is absolutely essential that Americans have the right to know what is in the food we are eating, and to be able to choose whether we want to eat food with GE ingredients.

I urge that the FDA forbid the release of any new foods or products containing GE ingredients until it requires long-term safety testing of all GE foods before they go to market. I also demand that GE foods presently on the market be clearly labeled, giving consumers the right to know what is in the food we are eating..

Sincerely,

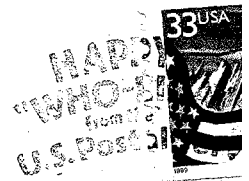

Dr. Mha Atma S. Khalsa
